A27449
T-cell surface glycoprotein CD4 precursor - rat
N;Alternate names: W3/25 antigen
C;Species: Rattus norvegicus (Norway rat)
C;Species: Rattus norvegicus (Norway rat)
C;Accession: A27449; A33433
C;Accession: A27449; A33433
R;Clark, S.J.; Jefferies, W.A.; Barclay, A.N.; Gagnon, J.; Williams, A.F.
Proc. Natl. Acad. Sci. U.S.A. 84, 1649-1653, 1987
A,Title: Peptide and nucleotide sequences of rat CD4 (W3/25) antigen: evide:
A,Reference number: A27449; MUID:87175535; PMID:3104900
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             A;Cross-references: UNIPROT:P05540; GB:M15768; NID:g203387; PIDN:AAA40901.1; PID:g203388 R;Davis, S.J.; Ward, H.A.; Puklavec, M.J.; Willis, A.C.; Williams, A.F.; Barclay, A.N.       Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

May regulate T-cell activation. SUBUNIT: Associates with p56-lck (By similarity). SUBCELLULAR LOCATION: Type I membrane protein. SIMILARITY: Contains 3 immunoglobulin-like C2-type domains. SIMILARITY: Contains 1 immunoglobulin-like V-type domain.
                                                                    61

May regulate T-cell activation.
-i- SUBUNIT: Associates with p56-lck (By similarity).
-i- SUBCELLULAR LOCATION: Type I membrane protein.
-i- SIMILARITY: Contains 3 immunoglobulin-like C2-type domain.
-i- SIMILARITY: Contains 1 immunoglobulin-like V-type domain.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Mol.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 FUNCTION: Accessory protein for MHC class-II antigen/T-cell receptor interaction. May regulate T-cell activation. SUBUNIT: Associates with p56-lck (By similarity). SUBCELLULAR LOCATION: Type I membrane protein. SIMILARITY: Contains 3 immunoglobulin-like C2-type domains. SIMILARITY: Contains 1 immunoglobulin-like V-type domain.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         181

May regulate T-cell activation.
-:- SUBUNIT: Associates with p56-lck (By similarity).
-:- SUBCELLULAR LOCATION: Type I membrane protein.
-:- SIMILARITY: Contains 3 immunoglobulin-like C2-type domains.
-:- SIMILARITY: Contains 1 immunoglobulin-like V-type domain.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  "Nuclear gene trees and the phylogenetic relationships of mangabeys (Primates: Papionini).";

J. Immunol. 22:2973-2981(1992).

FUNCTION: Accessory protein for MHC class-II antigen/T-cell receptor interaction. May regulate T-cell activation. SUBUNIT: Associates with p56-lck (By similarity).

SUBCELLULAR LOCATION: Type I membrane protein.

SIMILARITY: Contains 3 immunoglobulin-like C2-type domains.

SIMILARITY: Contains 1 immunoglobulin-like V-type domains.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              GO:0045058; P:T-cell selection; ISS.
